TIPS

- Papers are intended for use to transfer to white and light colored materials consisting of 100% cotton, cotton/poly blends, or 100% polyester.
- When transferring onto 100% cotton, be sure the garment is "Pre-Shrunk".
- Choose garment that have a tight weave. This is particularly important when transferring onto sweatshirts. Best washability is achieved when using a tight weave, 50/50 fabric.
- Heat presses vary in accuracy, conduct your own tests to determine the best time and temperature to use with your own equipment.
- **IMPORTANT:** We thoroughly test each of our products on various substrates using different transfer equipment. However, it is impossible for us to duplicate all variables using all substrates and transfer equipment. Therefore, it is essential that you test the paper prior to production using your equipment, methods, and substrate material. Heat presses vary in accuracy. Conduct tests to determine the best time and temperature to use with your equipment. Please keep in mind that the Seller's and Manufacturer's maximum obligation shall be to replace any paper that has proven to be defective. Neither the Seller nor the Manufacturer shall be liable for any injury, direct or consequential, arising out of the use of, or inability to use this paper.

Photo-Trans® SC Fabric Transfer Paper

Photo Trans® SC Transfer Paper is designed for fuser oil based and INDIGO printers.

IMPORTANT:

- **Photo-Trans® SC Fabric Indigo Transfer Papers are designed for fuser oil printers (INDIGO PRINTING PRESSES).**
- Designed to transfer photos and images to T-shirts, sweatshirts, mousepads, coasters, puzzles, binders, padfolios, and more.
- For best results, transfer your image at the CORRECT TIME, TEMPERATURE AND PRESSURE.
- Store your Photo-Trans® SC Transfer Paper in a color, dry area and do not remove from carton until you are ready to use. After opening store the paper in a re-sealable polybag.

PRINTING:

- Select "Mirror Image" feature to assure image copies in reverse.
- **Photo-Trans® PLUS paper should be fed into your copier/printer with the short (grain long) dimension first.**
- JET-PRO® SofStretch™ Heat Transfer Paper should be fed into the copier/printer with the short dimension first (grain long).
- Feed the Photo-Trans® PLUS paper according to the copier/printer manufacturer's directions. If you have any questions about how to feed the paper into the copier/printer brand and model you are using, please contact your manufacturer or dealer.
- Trim away any unprinted paper around your image that you do not want to transfer..

PRESSING INSTRUCTIONS:

- It is recommended that you only use a commercial heat press when transferring with this paper. Not for use with a hand iron
- Place the printed image on top of the garment with the image facing down (backing paper is facing you).
- Pre-heat your heat press to 191°C/375°F and allow to come to set point.
- Set press for heavy pressure (60 psi or greater).
- Pre-press garment for a few seconds to remove moisture or wrinkles.
- Place transfer face down on garment and press for 30 seconds.
- Peel while still hot

WASHING INSTRUCTIONS:

- Turn garment inside out. This will minimize the amount of abrasion that the transfer will encounter with other garments in the wash.
- Wash garment in cold water using mild detergent.
- **DO NOT USE BLEACH.**
- Dry on low heat setting.
- Do not iron directly on the transferred area.

NOTE: To bring brightness of colors back after washing, place a sheet of regular white paper over the image and iron at low cotton setting.

The POWER is in the PAPER™
